

# Industry Education Offerings

Suterra is proud to offer sought after academic experts to provide CEU eligible education to the industry. Credible, dynamic, and experienced thought leaders who are available for speaking opportunities including panels, presentations, and podcasts. Topics include:

- ▶ **Environmentally sustainable pest control**
  - ▷ Reducing use of insecticides
  - ▷ Integrated Pest Management
  - ▷ Mating Disruption
- ▶ **Identification, monitoring, and pest phenology**
  - ▷ Diamondback Moth
  - ▷ Spotted Wing Drosophila
  - ▷ Vine Mealybug
  - ▷ Navel Orangeworm
  - ▷ California Red Scale
  - ▷ Oriental Fruit Moth
  - ▷ Codling Moth
- ▶ **Laws and regulations:**
  - ▷ Emerging insecticidal regulatory changes
  - ▷ Federal and State regulations related to pheromones
  - ▷ Strategies for controlling pests within regulatory constraints

**Emily Symmes, Ph.D., Senior Manager of Technical Field Services at Suterra**, is an esteemed expert in pheromones and mating disruption, spearheading innovation in sustainable pest control. With decades of experience in applied entomology and integrated pest management (IPM), she empowers growers with effective solutions. Dr. Symmes is a sought-after speaker with several peer-reviewed academic publications. Suterra also has other recognized experts in chemistry, engineering, and entomology available for speaking opportunities.
