

Used Puffer® Stacking Instructions

Puffer® Stacking Instructions

Proper stacking of Suterra Puffers® promotes safe transport and reduces potential damage. Puffer® hooks are not eligible for return and should be reused the following season.

1. Turn Puffer® cans on their side and start first column at top left corner.
2. Face cans the same way as you work down the first column.
3. Face cans the other way for the next column, alternating until bottom layer is complete (3 x 13).

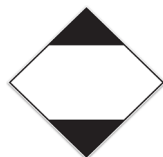

4. Lay 3 cans perpendicular to fill empty space created at bottom, then start next layer. 1 layer = 42 cans.
Note: stack each layer's 3 extra cans from the same corner to create a pocket.
5. Completing 7 layers will create a corner pocket. Fill with 8 additional cans standing up.
6. A full bin contains 7 layers of Puffers® laying down, with an additional 8 Puffers® standing, for a total of 302 Puffers®.

7. Cover and band top of bin with strong outer packaging¹ using bin's sidewall holes.
¹Strong outer packaging means sturdy, durable material to provide protection against the unintentional release of its contents during transportation.
8. Verify (or place) a durable Limited Quantity Label on at least one side of the bin.
Note: Outer packaging, banding & Limited Quantity Label not provided by Suterra.

Limited Quantity Label

Label must be standard size, 100mm x 100mm
